

LIQUID DYES: C SERIES

OIL-SOLUBLE, NON-PERSONAL CARE PRODUCTS

Our liquid dyes are the most soluble colorant available. Use them when you want a candle to be dyed throughout (not over-dipping).

USAGE

Paraffin and Vegetable Wax and Plastics:

Off-white Shades (Vanilla, Ivory)	0.004%
Pale Shades (Peach, Pink)	0.02%
Medium Shades (Red, Blue, Yellow)	0.2%
Dark Shades	0.4%
Black	0.6%
- (Less will give you varying shades of gray, more may result in burning problems)	

Factors that may affect the amount of dye required for the desired shade include:

- The opacity of the wax
- Wax additives such as stearic acid, polymers and microcrystalline wax
- Fragrance

Gel Candles and Oils:

Medium to Dark Shades	0.005% - 0.05%
Lighter Shades	less than 0.004%

**We recommend that you use a UV inhibitor in all products containing dyes. Ask us about our UV stabilizers.*

KEY BENEFITS

- Virtually free of insoluble matter
- No dusting as found with powders
- High Flash Point 200F/93C
- Easily mixed to create unique shades
- Concentrated
- REACH Compliant
- GHS Compliant
